Grey cells within years/months numbers = Redacted data due to small numbers under NHS Digital Rules.

From January 2015 to date, average age of death from seasonal flu   -   average age 78

From January 2015 to date, no. of seasonal flu deaths under 80 years old, WITHOUT a pre-existing medical condition.   -   Unable to answer

For 2020, no. of covid-19 hospital admissions, by month. –
-   information is published on https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-hospital-activity/   and
https://coronavirus.data.gov.uk/details/download

For 2020, no. of ICU beds occupied, by covid-19 patients, by month. -   Unable to provide figures. Typically ICU L3 capacity is 7 beds, though we do have the ability to flex to 9 beds in the ICU ward area when demand has increased. Furthermore we also have the ability to utilise SHDU and MHDU capacity which provides a grand total of 15 ICU beds.

For most of 2020, ICU L3 occupancy and capacity was 7 beds, however in March/April 2020 demand was so high occupancy and capacity for ICU L3 patients was increased further to a total of 20 beds, November occupancy and capacity was increased to a total of 11 beds and December occupancy and capacity was increased to a total of 10 beds.

For 2020, no. of deaths from covid-19, by month. -
