Behind the scenes look at Breast Care services success

More than 100 members of the public have been given a behind the scenes tour of the latest screening and treatment offered by The Dudley Group's leading specialist breast surgeons.

Guests visited the mammography suite, viewed X-ray images and listened to presentations about pathology services at Russells Hall Hospital during the Trust's members event.

The tour showcased the high quality care, services and facilities available to patients at the Trust.

The event gave guests the chance to find out more about the pathology service which supports the diagnosis and treatment of cancer. They also spoke face-to-face with breast care nurses, who offer support to breast cancer patients, and met many more teams who provide diagnosis, treatment and after care services to patients with breast cancer.

"The event was a fantastic opportunity for members of the public to learn more about our breast care services and be assured that we do the very best we can for each and every woman we see," said Professor Amtul R Carmichael, Consultant Specialist Breast Surgeon.

"We are very proud here at The Dudley Group for not only having the ability to deliver the best care and treatment possible to our patients but also presenting a 'behind-the-scenes' tour to enable guests to see the truly wonderful care and facilities our staff have to offer," said Richard Cattell, Director of Support Operations.
