FREEDOM OF INFORMATION REQUEST 012569 – Dermatology

Can you tell me if you have treated any patients with Hidradenitis Suppurativa as an in patient, if so how many.

Dermatology does not have inpatient care.

Dermatologists may go to see an inpatient on a ward but the care would not get transferred to them i.e. the patient's specialty would not change to Dermatology.

The Trust does not record what the patient was treated for, however, between 01/12/2014 and 30/11/2015 28 patients were admitted with a Diagnosis of "L732 - Hidradenitis suppurativa", mainly under General Surgery

Please go to the Trust website <http://dudleygroup.nhs.uk/services-and-wards/dermatology/> for information on the Trust's Dermatology service.
