FREEDOM OF INFORMATION REQUEST FOI/012705 – Chronic myeloid leukaemia

1. In your organisation, how many patients diagnosed with Chronic Myeloid Leukaemia (CML) have been treated in calendar year 2015?

7 patients with CML with a treatment commencing (first or subsequent) in 2015 within DGFT

2. Of these patients, how many are currently being treated with each of the following tyrosine kinase inhibitors (TKIs)?

Of the 7 patients from (1)

Dasatinib (Sprycel) 0

Imatinib (Glivec) 4

Nilotinib (Tasigna) 0

Ponatinib (Iclusig) 0

Bosutinib (Bosulif) 0

3. If possible, of these patients on a TKI, how many have had treatment with a previous TKI?

0 of the 4 patients from (2) had previously been treated with a TKI within The Dudley Group NHS Foundation Trust

4. In your organisation, how many patients diagnosed with Philadelphia positive (Ph+) Acute Lymphoblastic Leukaemia (ALL) have been treated in calendar year 2015?

Somerset Cancer Register does not have the ability to record whether the patient was Philadelphia positive. We only had 2 patients with (ALL) treated last year in total

5. Of these patients how many are currently being treated with each of the following TKIs?

Dasatinib (Sprycel)

Imatinib (Glivec) 1

Nilotinib (Tasigna)

Ponatinib (Iclusig)

Bosutinib (Bosulif)

Other (i.e. not on a TKI) 1
