FREEDOM OF INFORMATION REQUEST 013224 – Eating disorders

I would like to know how children under the age of 16 have been treated for eating disorders over the last five years.

I would like the figures to be broken down year by year and each of their ages.

I would also like to know what each of the disorders were and which hospital they were treated at.

The Trust does not **treat** eating disorders, patients may have them and the effects of them may cause the admission but we're not a treatment centre. We can provide figures on admissions with eating/nutrition issues as a diagnosis.
