FREEDOM OF INFORMATION REQUEST FOI/012903 – Carbon monoxide poisoning

I am writing to you under the Freedom of Information Act 2000 to request the following information from The Dudley Group NHS Foundation Trust:

- How many cases have attended A&E with suspected carbon monoxide poisoning between 1st July 2014 - 30th June 2015
- How many children aged 0-18 have attended A&E with suspected carbon monoxide poisoning between 1st July 2014 - 30th June 2015
- How many adults aged 60+ have attended A&E with suspected carbon monoxide poisoning between 1st July 2014 - 30th June 2015
- How many cases have attended A&E with suspected carbon monoxide poisoning between 1st July 2015 - 30th June 2016
- How many children aged 0-18 have attended A&E with suspected carbon monoxide poisoning between 1st July 2015 - 30th June 2016
- How many adults aged 60+ have attended A&E with suspected carbon monoxide poisoning between 1st July 2015 - 30th June 2016
- How many cases have been treated in A&E with suspected carbon monoxide poisoning between 1st July 2014 - 30th June 2015
- How many children aged 0-18 have been treated in A&E with suspected carbon monoxide poisoning between 1st July 2014 - 30th June 2015
- How many adults aged 60+ have been treated in A&E with suspected carbon monoxide poisoning between 1st July 2014 - 30th June 2015
- How many cases have been treated in A&E with suspected carbon monoxide poisoning between 1st July 2015 - 30th June 2016
- How many children aged 0-18 have been treated in A&E with suspected carbon monoxide poisoning between 1st July 2015 - 30th June 2016
- How many adults aged 60+ have been treated in A&E with suspected carbon monoxide poisoning between 1st July 2015 - 30th June 2016

The Trust is only able to clinical code patients admitted on a ward with carbon monoxide poisoning.

During the two years identified there were five patients who were admitted with an ICD10 code of T58X - toxic effect of carbon Monoxide, via the Emergency Department, and treated on the ward.

1st July 2014 - 30th June 2015

Three patients admitted

Zero in the 0 -18 age range

Two in the 60+ age range

No patients died.

1st July 2015 - 30th June 2016

Two patients admitted

One in the 0 -18 age range

Zero in the 60+ age range

No patients died.
