This request relates specifically to water hygiene and the measures taken to prevent infection from waterborne pathogens.

Can you please advise the number of point-of-use filters used per annum by the Trust to prevent waterborne bacteria exiting the water system.

Ideally a breakdown giving the number of filters used in 2014, 2015 and 2016. However, if only approximate annual usage figures are available then this will be adequate for our purposes.

We have no point of use filters in use an please note :
