FREEDOM OF INFORMATION REQUEST FOI/013505 – Resus trolley

I would like to make a Freedom of Information Request please. I would like to know the following:

What does the Trust use for securing the contents of resus trolleys? For example is a tamper evident seal used, or a lock and key? (If a seal is used, could you provide a brief description of the type used?)

How many of these seals/locking mechanisms are used by the Trust annually?

The Trust currently uses a signed paper tamper seal, that connects through the draws of the trolleys used across the Trust.

The Trust does not maintain a central record of the use and replenishment of these paper seals, however as an estimate

45 trolleys x 140 arrest events per area with a trolley = 6300

What is the Trust's annual spend on these? - £1485.84

Where does the Trust order these from? (If they are procured through the NHS Supply Chain what is their product code?) H.Jenkinsons

Who is responsible for ordering this product - Wards and departments order directly when needed
