FREEDOM OF INFORMATION REQUEST FOI/013598 – Steven-Johnson Syndrome

Please may I make an FOI request adapted from a previous request I have made in relation to Modafinil and diagnoses of Steven-Johnson Syndrome.

To refine my request in the hope it may bring it within the statutory requirements, please may you tell me:

By accessing records of patients attending the trust or its hospitals or medical centres an diagnosed with Steven-Johnson Syndrome (or SJS) in the past financial year (2016-17), how many of records make any mention of Modafinil, whether a known prescription or assumed cause of the case.

I anticipate there will be in the region of around 10 patients diagnosed per year per trust, judging by my previous request, so I hope it will not take too long to process the records manually.

Information held within individual patient notes is not accessible under the Freedom of Information Act, exemption section 40 Personal Information
