FREEDOM OF INFORMATION REQUEST FOI/013708 – Continence service

I would like to know how long patients are waiting to be seen by a specialist continence nurse within your trust. (I do not need the information broke down into specific clinics, just a waiting time from referral source to being seen.)

The response is dependent on the patient - how quick they respond to the letter that is sent out giving consent to be seen for treatment. A patient can be seen within 4 - 6 weeks depending on clinic availability
