FREEDOM OF INFORMATION REQUEST FOI/013796 - Idiopathic Pulmonary Fibrosis (IPF)

Does your Trust manage/treat patients with Idiopathic Pulmonary Fibrosis (IPF) (ICD-10 J840, J841, J848, J849)?

The Trust does not treat IPF with antifibrotics.

We all refer patients (when they meet the criteria published by the department of health) to a tertiary centre for antifibrotics.

Most consultants refer to Heartlands, whereas others refer occasionally to the QE.
