8/2/18

Within your trust how many patients have been treated, in the past 6 months July to December 2017 by diagnosed eye condition. Of these patients how many are new to treatment [they have not previously received an injection / implant]?

Using our standard method for counting injections and patients, I have the following figures for Jul-Dec 2017 :

	Total Pts	New Pts	Lucentis Pts	Lucentis New Pts	Eylea Pts	Eylea New Pts
Total	753	199	455	110	298	89
Wet AMD	479	119	316	91	163	29
Other	274	80	139	19	135	61

*Our clinical coding process, which captures the actual procedures and diagnoses for our treated patients, uses the ICD10 and OPCS4 coding systems, which do not map to the breakdown of diagnoses and drugs requested, and therefore we cannot provide the full statistics split in this way. Our statistics are therefore the best approximations we can give from the data held electronically by the Trust*
