FREEDOM OF INFORMATION REQUEST FOI/013911 – Going digital / potassium treatments

As you are going digital April 23rd, will this include Potassium treatments are recorded from then on?  
Will patient information uploaded be back dated to a certain year?  
With such a life or death affect I'm surprised you don't keep this treatment monitored electronically already.

The Trust will not be recording potassium treatments specifically (oral or IV ) digitally from April 2018.  
This information will still be recorded in the patients paper records until a later phase of the digital delivery programme
