FREEDOM OF INFORMATION REQUEST FOI/013924 – Hepatitis C

In the last two months, how many Hepatitis C patients have been treated with:

- A: Vosevi (also known as sofosbuvir + velpatasvir + voxilprevir) - 0
- B: Maviret (also known as glecaprevir + pibrentasvir)
- C: Viekirax (also known as sofosbuvir + paritaprevir + ritonavir) - 0
- D: Viekirax/Exviera (also known as sofosbuvir + paritaprevir + ritonavir + dasabuvir)
- E: Epclusa (also known as sofosbuvir + velpatasvir) - 0
- F: Zepatier (also known as elbasvir + grazoprevir)

Questions B, D and F, due to the low numbers and to prevent the patients possibly being identified if information is released into the public domain the numbers are not being released
