FREEDOM OF INFORMATION REQUEST 014193 - Emergency re-admission rates

Last year, we published a briefing to look at the emergency readmission rates across 72 hospital trusts between 2012/13 and 2016/17. We are looking to bring the dataset up to date.

As you will be aware, emergency readmissions are currently recorded as any patient subject to an unplanned readmittance within 30 days of being discharged. But to understand any impact fully this data needs to be broken down by each day within the 30 day period.

Please see below:-

Number of days after discharge patient was readmitted	Number of patients subject to emergency readmission during 2012/13	Number of patients subject to emergency readmission during 2013/14	Number of patients subject to emergency readmission during 2014/15	Number of patients subject to emergency readmission during 2015/16	Number of patients subject to emergency readmission during 2016/17	Number of patients subject to emergency readmission during 2017/18
0	200	441	468	474	477	484

Grand Total	4198	7849	9452	10591	10782	10403

Please Note:- All Emergency Admissions are included

There was a switch in 2012/13 of patient recording of EAU from outpatients to admitted which has impacted on readmissions

In 2014 AEC was opened which has also impacted on the number of readmissions
