FREEDOM OF INFORMATION REQUEST FOI/014290 - Under 18's conceptions and births

I would like to submit the following Freedom of Information request, under GDPR legislation to support with a West Midlands-wide piece of work I am undertaking in partnership with West Midlands Organised Crime Unit and West Midlands Police.

Please could you provide me with the following data:

-How many under 18yrs conceptions your trust holds data on, who presented between 01.04.2017 -31.03.2018 where the mother identified as:

- Romanian
- Hungarian
- Albanian
- Roma/Gypsy

-How many under 18yrs births your trust holds data on, who presented between 01.04.2017 -31.03.2018 where the mother identified as:

- Romanian
- Hungarian
- Albanian
- Roma/Gypsy

Please note, a patient's nationality is not a mandatory field on our Patient Administration System so this field is not always populated, and while a report has been run it will only include under 18 year olds where the nationality field is populated.

Furthermore upon review of the antenatal booking and births data (based on the criteria in the FOI request) it is not possible to share any results data due to there being too few numbers, and therefore constitutes identifiable information.
