FREEDOM OF INFORMATION REQUEST 014835 - Number of Downs (Trisomy 21) patients

I wonder if you could confirm the number of Downs (Trisomy 21) patients you have and their age breakdown, this is for a piece of research I am carrying out regarding osteoporosis and DEXA services to this particular population.

Not known, there is no way to correctly establish the number of Downs patients who have come into the Trust from Trust systems.

If a Downs patient came in as an inpatient the clinical coding may reflect this but there is no way to establish Downs patients who have come into out patient clinics.
