FREEDOM OF INFORMATION REQUEST FOI/015720 - covid

As the Covid vaccine is still in the trial period until 2023 and there are no long term safety studies I am requesting the following information below.

As covid death is counted as anyone who has tested positive in the past 28 days and dies of any cause please provide the following information.

1. Current numbers of people in ICU who had taken the covid vaccine any time in the prior 28 days
2. Number of people who have presented with serious side effects, (clots, blindness, shingles etc) within 28 days of having the vaccine.
3. Number of deaths reported where the person received the vaccine anytime within the prior 28 days.

The Trust is unable to answer these questions as we do not hold data on the covid vaccination status of patients that are treated in the acute setting.
