

FREEDOM OF INFORMATION REQUEST 015970 - Staff NOT yet fully vaccinated against COVID

21/12/21

Please could you give us the current

% of staff NOT yet fully vaccinated against COVID in Dudley Group NHS Foundation Trust acute and community the
date of that figure was recorded
a breakdown of that percentage in
% clinical acute setting
% admin
% community (if role contains duties that include both community and acute please include this percentage into the acute figure)
If % for admin is not available community and acute will suffice.

Unable to answer.

Previously, as vaccinations were not a mandatory requirement (it was personal choice) the Trust had no need to record the vaccination status of staff on Trust systems.

Going forward staff are now being asked to provide their vaccination passports for the Trust to be able to monitor the vaccination status of staff. This commenced during December and is an on-going process in which we are working with staff to understand their status.
