

Problems or questions for patients receiving Brolucizumab (Beovu) Intravitreal injections

1. Have you developed 'floaters' and/or 'flashing lights' in your eye after a Beovu injection?
2. Have you developed 'blurred or darkening of vision' in your eye after a Beovu injection?
3. Have you developed 'redness or dull ache' in your eye after a Beovu injection?

If the answer to any of these questions is **yes**, this may indicate severe inflammation. Please contact us immediately on the following numbers and inform the responder.

Eye Department, Urgent Referral Clinic (URC), Russells Hall Hospital
01384 456111 ext 3633.

In case of an emergency after the closing hours of the Eye Clinic at Russells Hall Hospital (including weekends and bank holidays), please contact Birmingham and Midland Eye Centre on **0121 507 4440.**
