Please supply the total number of investigations, the unit price you paid and the total cost for:

*The Trust is currently going through a period of intense focus on pathology and are moving into a far more commercial environment where data on workload and cost are commercially sensitive. This is particularly relevant at a time when there is a public debate around the increasing role private companies have in delivering public services. There is a public interest in ensuring that companies are able to compete fairly. There is also a public interest in ensuring that there is competition for public sector contracts. In considering the release of the requested information, The Trust has taken these issues into account and under section 43 of the Freedom of Information Action deems the unit costs commercially sensitive.

However the Trust is able to respond with the figures for the total costs:

The Total cost to the CCG for all of the above tests was £87,506
