FREEDOM OF INFORMATION REQUEST 012636 – Blood groups and death

With Freedom of Information time limits please provide me with -

Blood groups of patients that have died in hospital:

Specifically the following blood groups broken down by percentage:

RH D +

RH D - (further split into RH D Feroglobin (Copper) and RH D Haemoglobin (Iron))

Result	Total Patients Tested	
+ve	14029	83.42%
-ve	2788	16.58%
Total	16817	

Result	2015 Deaths in Hospital	
+ve	551	82.73%
-ve	115	17.27%
Total	666	
Not Known	1106	
Grand Total	1772	

The Trust does not look for Feroglobin or Haemoglobin when testing for blood groups.
