**5 In each month in the period defined above, how many elective operations were cancelled on the day of admission?**

All figures quoted in questions 1 - 5 are for on the day cancellations

The Trust can only provide cancellation data for the day of admission.

The Trusts theatre operating lists are locked down 24 hours before the day of procedure. The Theatres Database System therefore does not record planned operations any more than 24 hours in advance and so can only provide on the day cancellations
