FREEDOM OF INFORMATION REQUEST FOI/013009 – Adults treated on childrens ward

In the last three calendar years: How many adult patients have been admitted to and/or treated on children or teenage wards in hospitals at your trust?

Please provide this information broken down by calendar year for 2013, 2014, and 2015.

In the last three calendar years 2013 - 2015 there has been one adult admitted to the children's ward where the admission was appropriate due to the medical condition of the patient.

Due to the low number and specifics of the diagnosis we have not broken this down by year.
