FREEDOM OF INFORMATION REQUEST 013424 Hepatitis C

I have a request regarding treatment of Hepatitis C, does your trust treat Hepatitis C ? [Yes]

How many patients with Hepatitis C are registered, or recorded as under you care?

35 Patients are on the waiting list to commence treatment.

2 are on hold (either due to patient choice or a clinical reason)

18 on treatment

By way of explanation, I am hoping to understand the number of patients with the disease that are waiting for treatment, as well as in treatment. Any figure you could supply to answer this would be helpful.

(See above figures for breakdown)

Please could you supply the following information, for patients with hepatitis C, for the last month if possible.

Please use the tables to enter by genotype as possible thank you.

	By genotype as follows						
Interferon Free Treatment	1A	1B	2	3	4	5	6
Epclusa				2			
Harvoni							
Sovaldi							
Sovaldi/Olysio							
Sovaldi/Daklinza							
Viekirax							
Viekirax/Exviera							
Zepatier	2						

**** TREATMENT START APRIL 17**

If your systems do not support the ability to split by treatment, please supply total treated by the genotype split. Similarly, if you are unable to split by genotype, please just split by treatment type. Many thanks for your help.
