FREEDOM OF INFORMATION REQUEST FOI/014437 - IT Systems

FAO - Fol lead The Dudley Group NHS Foundation Trust

inidus are interested to understand the IT applications that The Dudley Group NHS Foundation Trust are using to manage the clinical records of patients across all departments and specialities listed below my signature. Our request is limited to systems holding patient clinical records as an electronic health record (EHR), and excludes systems such as Patient Administration Systems (PAS), Portals, and other back office corporate systems that are not used by clinicians to handle patient clinical records..

I anticipate that this list of IT applications should be available as part of the Trust's compliance with GDPR.

For each system, please list both the system name and the manufacturer or vendor. Where there is an in-house IT application, please provide contact details for the person responsible for this application.

The names of systems and suppliers have not been released, Exemption (43) has been applied given it is commercially sensitive in that providing this information may compromise information security.

It Is imperative that the Trust is cyber resilient, cyber-attacks against infrastructure have the potential to inflict significant, real-life disruption and prevent access to critical services that are vital to the functioning of Trust systems.

If release of information could potentially damage the Trust's IT systems this information will not be released.
