FREEDOM OF INFORMATION REQUEST FOI/014601 – implant based reconstruction

Under the Freedom of Information act I would like to request the following information.

Over the past 12 months how many implant based reconstructions have been performed at each individual hospital within your trust?

It would be extremely helpful if you could list the hospitals and number of procedures separately.

All operations performed at Russells Hall Hospital.

Insertion of prosthesis for breast = 30 patient admissions

There were also 10 admissions for revision, removal and renewal of prosthesis of breast
