FREEDOM OF INFORMATION REQUEST FOI/014603 – clinical documents

- How do your clinicians compile patient records (e.g. using pen and paper, word processing, speech recognition or another method)?

The Trust clinicians currently utilise pen & paper, word processing and clinical systems integration to compile patient records.

- Has your Trust deployed technology that will enable doctors to more quickly and accurately complete and/or process clinical documents? If so, what technology has been deployed and when was it deployed?

Yes – the Trust is currently deploying a fully integrated EPR system.

- Is your Trust using artificial intelligence to improve patient services? If not, do you plan to invest in these services in the next 12 months?

No, no planned investment to date
