

The urology multidisciplinary team

Patient Information Leaflet

You are under the care of the Urology Department and your care is managed by the urology multidisciplinary team (MDT). The team consists of:

- urology consultants
- a consultant histopathologist (who interprets biopsies)
- a consultant radiologist (who interprets X-rays and scans)
- a consultant oncologist (who is skilled in non-surgical cancer treatments)
- clinical nurse specialists (key workers)
- an MDT coordinator

The team meets weekly to discuss the most appropriate care for all new patients and those patients whose condition has changed, based on the information from doctors' examinations, biopsies, scans and X-rays. Once these meetings have been held, if your care has been discussed, an appointment will be made for you with your consultant to discuss suitable treatments.

If you would like a permanent record of your consultation, such as a copy of the letter sent to your GP, please ask when you see your consultant or nurse.

We sometimes send patient details, scans and other information related to the case, to other hospital trusts for discussion or another opinion. If you do not want this to happen with your details, please let us know.

If you require any more information, or wish to contact a member of the team, your first point of contact should be a clinical nurse specialist (CNS, your key worker) or your consultant's secretary.

Contact information

Name	Role	Contact number
Mr S A Shahzad	Consultant urologist	01384 244201 ext. 2201
Mr P Anderson	Consultant urologist	01384 244203 ext. 2203
