FREEDOM OF INFORMATION REQUEST FOI/016434 - Outstanding structural maintenance issues

Under the Freedom of Information Act (2000), I would like to request the following information. If it is not possible to provide the information due to the request exceeding the cost of compliance limits identified in Section 12, please provide advice and assistance, under the Section 16 obligations of the Act, as to how I can refine my request.

As of the date of this request, what is the longest amount of time - in days - that one of your outstanding structural maintenance issues has been left unresolved? Structural maintenance issues could include leaks, collapsed ceilings and creaking support beams.

Please could you answer Q1 for the three structural issues which have been left unresolved for the longest amount of time, in descending order.

Please send all of your trusts' hospital reports - commissioned since 01/01/22 - into the safety of their buildings and the risk posed to patients in the event of structural failure in the hospitals. If there are no reports as of 01/01/22, please send the Trusts' most recent report.

- No structural issues and no reports commissioned

Please note:- The Dudley Group NHS Foundation Trust operates a Private Finance Initiative (PFI) Contract with Summit Healthcare and Summit contract out to Mitie. All Facilities Management services are provided by our PFI Partners and this includes hospital buildings and grounds.

The above response is from our PFI provider.
